

SPECIALTY FINISHES

PREPAINTED DECORATIVE SOLUTIONS

Steelscape Prints® - Slate - Cinder Gray shown on a roof application

OUR COMPANY

Steelscape has built a reputation of being the industry leader of high quality metallic-coated and pre-painted steel across the nation. Steelscape's manufacturing capabilities are ideally suited for light gauge construction products and are supported by reliable delivery performance and responsive customer service. With facilities in Kalama, Washington, and Rancho Cucamonga, California, Steelcape is strategically located near major truck, ship, and rail routes to best serve the U.S. market. Steelscape's business philosophy is simple...listen to the customers' needs and then partner to provide the perfect solution for their project.

Steelscape products can be used for a wide range of applications, such as metal buildings, architectural roofing, decking and framing, and other applications like HVAC supplies and flex conduit. Steelscape's modern facilities, sophisticated computerized operations, and well defined processes ensure quality control stays top-of-mind. In addition, the unique ability to process hot band-coil from pickling to painting under one roof allows Steelcape to control the entire coating process, so customers know the finished product will meet the industry's highest standards for durability, formability, and appearance. Customers may order their product in a wide range of thicknesses, widths, grades, and coating weights. Moreover, Steelscape offers value-added processing that includes slitting, embossing, cut-to-length, and toll processing.

Employee health, safety, and well-being are the highest priority at Steelscape. The company's safe-workplace programs are designed to minimize risks and promote safe behaviors. Steelscape is also proactive with its environmental footprint. Its processes, equipment, and facilities are kept clean and designed to minimize emissions to the air and water. Steelscape actively participates in industry efforts to ensure steel is accurately promoted for its environmental benefits and strengths as compared to other construction materials.

Steelscape, a business unit of NS BlueScope Coated Products, has been a trusted partner to its customers and community for over 20 years. Nearly four hundred employees strong, Steelscape's team is committed to its value proposition of delivering the right steel to the right place at the right time every time...that is Steelcape's commitment to each and every customer.

STEELSCAPE OFFERS A WIDE SELECTION OF SPECIALTY FINISHES

AVAILABLE SUBSTRATES:

TRUZINC® (Galvanized) **STEEL**
